Auto-Enrol delivered...

Maximising the might of middleware

How Advisers can use middleware to
deliver Auto Enrolment services to clients

www.enrolwithease.com

Brain wave!

Middleware is the brains behind Auto Enrolment. It plans how you will manage the introduction of a scheme, calculates contributions and ensures that you and your clients comply with scheme duties.

Middleware is the system that links HR and payroll systems with pension providers and administrators. Without middleware you will be less able to provide a complete client service experience as there will be elements of the enrolment process that they will need to seek elsewhere. And elsewhere they will go, as employers are looking to their Advisers for their support during the arrival of Auto Enrolment.

The next page explains the role of middleware in more detail and the various elements of the process it can manage for you. It's one single system; one set of processes and one client service proposition that can be delivered again and again.

eAsE, one of the UK's leading Auto Enrolment middlewares, helps you manage the process of Auto Enrolment from start to finish. The system is easy to use, web-based and cost effective – specifically built for Advisers to help you maximise the great Auto Enrolment opportunity.

To find out more or book a demonstration please contact a member of our team using the details below.

The role of middleware

Auto Enrolment goes live!

By facilitating the steps above you will ensure that your client is now 'Enrolment ready'. All that you need to do then is submit your client's data file to their chosen provider. Many providers enable you to enrol a scheme online, via a simple application and upload tool, meaning that you will be able to setup a scheme within a matter of minutes.
