Powerful data management software facilitating the analysis and cleansing of data and delivering HR data mapping for HR system migrations.

A web based solution for the secure storage and retrieval of historic HR and Payroll data, providing a low cost alternative to retaining data across legacy platforms.

DATA SOLUTIONS

DATA CLEANSE & ANALYSIS

Our bespoke software provides an efficient and cost effective approach to data analysis, improving the quality of data being migrated to your new HR platform.

DATA CONSOLIDATION

ITM will consolidate both your HR & Payroll data from multiple legacy sources into a single format.

DATA MAPPING

Our software maps your data to the database structure of your new HR platform. Using our software enables an efficient and repeatable data mapping process, including a full audit trail.

DATA ARCHIVING

eArchive enables legacy platform decommissioning, adherence to GDPR subject access and regulatory compliance.
